Allowable Subject Matter

1. Claims 1-23 are allowed.
2. The following is an examiner's statement of reasons for allowance: The most relevant prior art of reference was that which was submitted by the applicants.

However, they do not teach nor fairly suggest singularly or in any combination thereof a method for use with a crystal growing apparatus for optimizing a cooling rate of a monocrystalline ingot grown according to a Czochralski process, said crystal growing apparatus having a heated crucible containing a semiconductor melt from which the ingot is grown, said ingot being grown on a seed crystal pulled from the melt, said crystal growing apparatus having a receiving chamber into which the ingot is pulled, said ingot being pulled along a generally longitudinal path toward the receiving chamber said method comprising: determining a first temperature of the ingot when the ingot is at a first position along the path; determining a second temperature of the ingot when the ingot is at a second position along the path, said first and second positions being separated by a distance D along the path; determining a cooling rate of the ingot as a function of a difference between the first temperature and the second temperature relative to an amount of time for pulling the ingot the distance D ; generating a signal representative of an error between a target cooling rate of the ingot and the determined cooling rate of the ingot; and adjusting one or more post-growth processing parameters as a function of the error signal thereby to control the cooling rate of the ingot.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
